## Need a solution for managing 1-ton bulk bags?

Our heavy-duty Hanen Tote Skid is built to handle a wide variety of FIBCs—also known as super sacks, bulk bags, jumbo bags, or tote sacks—with lasting durability and ease.

✓ Easy to Use ✓ Heavy Duty ✓ Support for the Sides ✓ Higher Vertical Reach ✓ Ability to Dispense from the Center

## Tote Skid: Key Features

### Easy to Use and Forklift Ready

Just bolt it together and get to work. Built-in fork pockets make transport and placement quick and easy.

### Heavy-Duty Build

Constructed from 7-11 gauge powder-coated steel, this skid stands up to the toughest environments—rain, dust, UV exposure, or heavy industrial use.

### Support for the Bag

Engineered to keep bulk bags upright and steady during filling or discharge.

### Specifications

46" L x 48" W x 46" H

**Material:** The base is 9" high and made of 11-gauge mild steel. The four vertical bag supports are made of 7-gauge steel.

**Center Opening:** 22" x 28"

## Flexible Intermediate Bulk Container (FBIC)

FBIC is a large, durable bag used to store and transport bulk dry flowable materials, often referred to as:

- Bulk bags
- Super sacks
- Tote bags
- Jumbo bag
- Dumpy bag
- Big bag

## Perfect for Any Industry

From agriculture to construction, food processing to material handling, the Hanen Tote Skid delivers a forklift-ready, ultra-stable base for:

- Agricultural Products
  - Grain, seed, and fertilizer
  - Animal feed and alfalfa
- Construction & Industrial Materials
  - Salt (calcium chloride), sand, and cement
  - Powders, resins, and grains
  - Plastic granules
- Food Ingredients
  - Sugar, coffee beans, flour, and spices
- Energy & Environmental
  - Charcoal
  - Compost and mulch
